CRYSTAL
POWDERDOSE
Automate Powder Dispensing
Minimize Variability
Maximize Productivity.

What makes powder dosing so hard?

Manual weighing is slow, messy, and error-prone.
Chemspeed's CRYSTAL POWDERDOSE changes that.

Manual weighing

Automated Dosing

- Gravimetric dosing of solids (1 mg to gram level)
- Handles sticky, fluffy, or static-charged powders
- Prepares single or multi-powder vials, fully unattended
- Replaces manual scooping, tapping, or correcting

Who uses it?

Pharma | CROs | CDMOs | Materials | Agro | Academia

Smart automation. Seamless integration.

Microbalance
Real-time gravimetric feedback

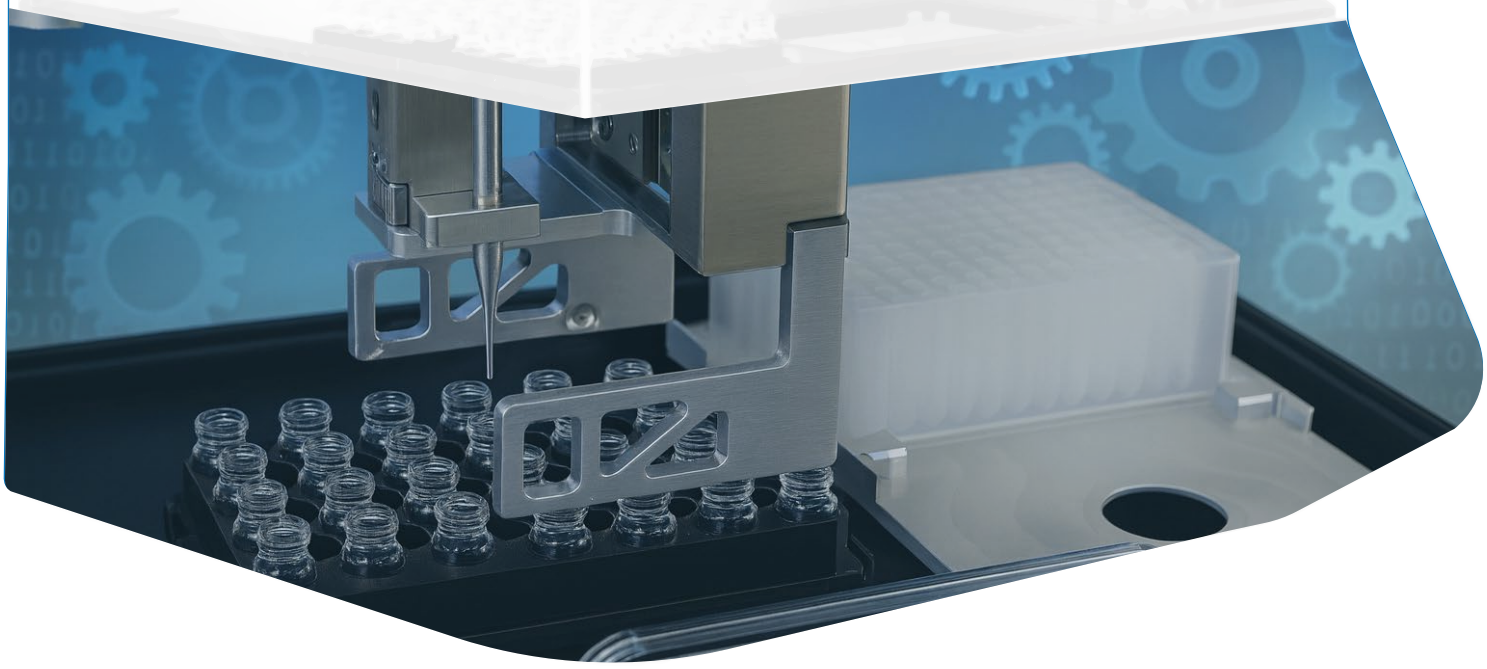

Powder Tools
Interchangeable heads for different textures

Ionizer
Removes static

Vial deck
Holds tubes, flasks, capsules, etc.

ARK Suite
Full traceability, data logging and reports

Autosuite Software
Plan and run your workflow

One platform. Many industries.

Pharma R&D

Formulation prep, blend uniformity, solubility profiling

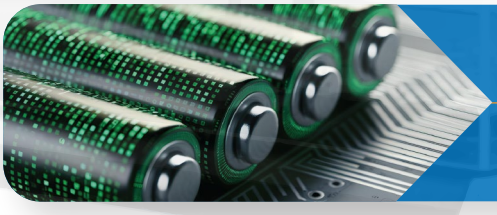

Agrochemicals

Seed treatment testing, pesticide formulation

Specialty Chemicals

Pigment dosing, additive screening

Battery Materials

Powder layering for cathodes/anodes

Academia & Institutes

Sample prep for HPLC/GC/IR

Your lab deserves better than guesswork.

- Cut prep time by 40–80%
- Eliminate weighing errors
- 24/7 unattended operation
- Consistent, traceable results
- One system for all solids
- Easy to validate for GMP labs

> *"After switching to Chemspeed, we never looked back"*

— CRO Lead, Hyderabad

Six realistic lab scenarios where CRYSTAL POWDERDOSE creates real impact.

Pharma R&D Screening

Preparing 96 samples with different excipients?
CRYSTAL automates powder dosing in hours, not days — with zero manual correction.

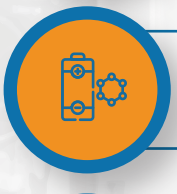

Agrochemical Formulation Lab

Multi-powder recipes for herbicide and pesticide prep.
No more clumping, static, or overdosing — just consistent, accurate results.

Analytical Chemistry Prep

Lab preparing reference standards for HPLC and LC-MS.
Automated solid dosing ensures tight control over mass-to-volume ratios.

Battery R&D / Materials Science

Layering small doses of lithium, cobalt, and binders?
CRYSTAL supports microgram to gram-level accuracy for advanced materials work.

Pilot-Scale CDMO

Dosing multiple APIs into capsules for stability batches.
Automated vial/capsule filling eliminates operator error and ensures GMP-ready documentation.

Academic High-Throughput Facility

200+ samples per semester for parallel experimentation.
Set once, run unattended — weekend automation made easy.

These are typical lab needs we see worldwide. If your team doses solids frequently, CRYSTAL POWDERDOSE is worth exploring.

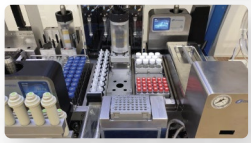

Specifications That Matter.

Parameter	Value
Dosing Range	0.1 mg to 5–10 g
Balance Resolution	0.01–0.1 mg
Number of Powder Heads	Up to 6
Liquid Handling	Optional
Sample Formats	Tubes, vials, capsules, flasks
Software	Autosuite + ARK Suite
Power	21 CFR Part 11 ready
Footprint	110/220 V
Dosing Range	~80 × 70 × 70 cm

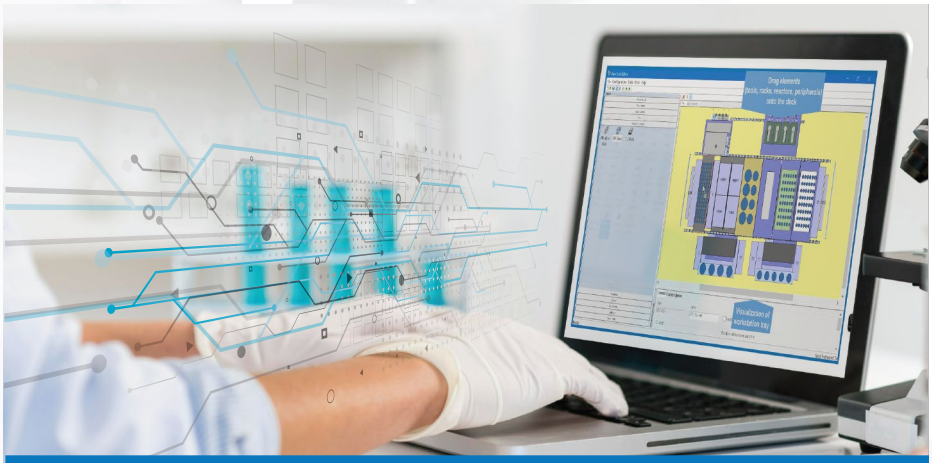

More Than Powder Dosing. Discover the Full Power of Chemspeed Automation.

Chemspeed's portfolio covers every phase of lab automation *— from liquid handling and synthesis to purification and formulation. All systems are modular, software-driven, and supported in India by Inkarp.*

Tools	Use Area	Key Functionality
	Liquid Handling	Automated micro-to-milliliter precision dispensing
	Parallel Synthesis	Multiple reactions in parallel with automation
	High-throughput Formulations	Gravimetric solid & liquid handling + mixing
	Kilo-scale Organic Synthesis	Fully automated synthesis + workup
	Flash / Prep Purification	Prep automation with fraction control
	Sample Weighing	Solid weighing and vial labeling

Smart Software. Seamless Lab Integration.

Behind every Chemspeed system is a powerful digital backbone.

Autosuite

- Drag-and-drop workflow builder
- Real-time control of dosing, balancing, liquid addition, etc.
- Operator-friendly UI with visual checks
- Pause/resume or parallel workflows

Autosuite

- Data traceability and audit trail
- Sample barcode tracking
- Historical data retrieval for repeat runs
- 21 CFR Part 11 and GMP-ready
- Integration with LIMS and external analytics (optional)

Built for Compliance. Designed for Ease.

If you work in a regulated lab, automation is not a luxury — it is a requirement.

Section 1: GMP & 21 CFR Part 11 Ready

- Access control and audit logs
- Time-stamped dosing and sample history
- Digital signatures and traceability
- Compliance documents available for validation

Section 2: Reproducibility & Quality Assurance

- Gravimetric control on every vial
- Standardized protocols that can be replicated globally
- No manual errors, no missing data

Section 3: Cleanroom & Lab Safety Friendly

- Enclosed units for minimal powder exposure
- Optional integrations: HEPA, fume extraction, glove access

Start Small. Scale Fast.
Chemspeed Grows With You.

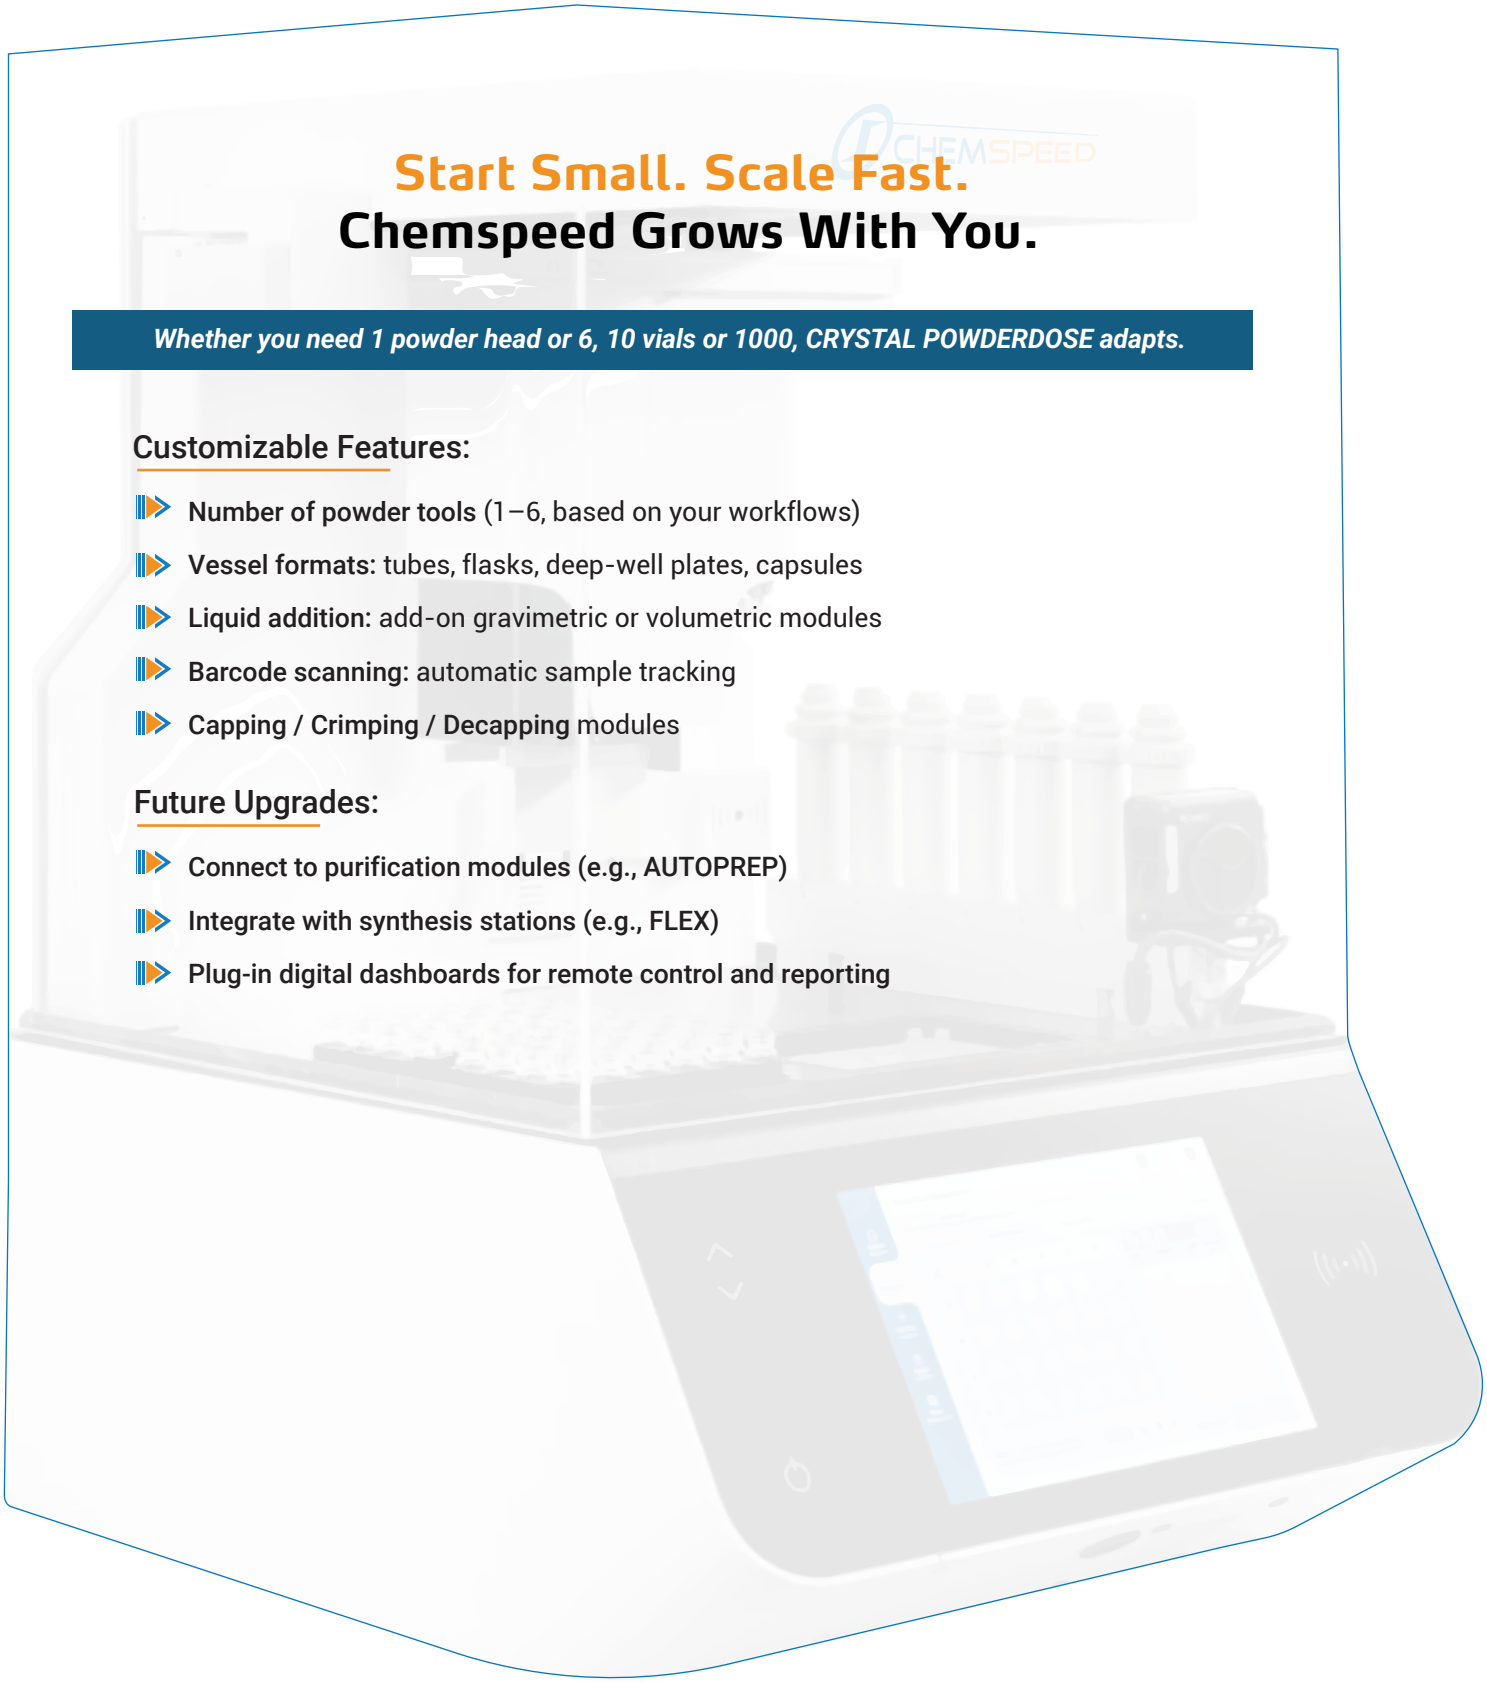

Whether you need 1 powder head or 6, 10 vials or 1000, CRYSTAL POWDERDOSE adapts.

Customizable Features:

- **Number of powder tools** (1–6, based on your workflows)
- **Vessel formats:** tubes, flasks, deep-well plates, capsules
- **Liquid addition:** add-on gravimetric or volumetric modules
- **Barcode scanning:** automatic sample tracking
- **Capping / Crimping / Decapping** modules

Future Upgrades:

- **Connect to purification modules (e.g., AUTOPREP)**
- **Integrate with synthesis stations (e.g., FLEX)**
- **Plug-in digital dashboards for remote control and reporting**
