Genevac Benchtop Solvent Evaporators

Flexible Solutions Designed to Scale from Lab to Production

Genevac: The Global Leader in Solvent Evaporation Technology

Genevac serves thousands of customers across nearly every chemistry application. Our patented solutions are highly scalable and flexible. Solvents, from water, acetonitrile to DMSO and HCl, can be efficiently removed in a few to thousands of samples in parallel, in virtually any sample format, including microtiter plates, vials, tubes, and flasks. All systems come with lifetime applications support, enabling customers to leverage over 35 years of expertise and optimize workflows. Current industries and applications include:

Industries Served:

- Pharma
- Biotech
- Diagnostics
- Academic Research
- Materials Science
- Agricultural Science
- Chemicals, Oil and Gas
- Environmental Research
- Fragrances and Flavors

Applications:

- Medicinal Chemistry
- High-throughput Screening
- Oligo Synthesis
- Synthetic Biology and Chemistry
- RNA Therapeutics
- Protein and Peptide Concentration and Purification
- Chemical Synthesis
- Environmental Analysis
- Crystallography
- Extractables and Leechables
- and many more!

Our Systems at a Glance

Instrument (Model)	Sample Carriers/ Holders	Sample Formats	Capacity	Solvent Compatibility
miVac 2 (DNA, Duo, Quattro)	Fixed-angle or swing rotors	Tubes, microplates, vials, flasks	DNA: 48 tubes or up to 6 microplates; Duo: up to 6 shallow plates; Quattro: up to 20 shallow or 8 deep-well plates	Volatile organic solvents, water, medium boiling point solvents; DNA: methanol, ethanol, water
EZ-2 4.0 (Standard, Plus, Elite, Bionic)	2 sample carriers	microplates, vials, tubes, bottles, flasks	Up to 8 microplates, 48 tubes, 80 vials	Standard: low BP inc. water, acetonitrile, DCM, methanol , TFA, organic solvents Plus: Medium BP inc. DMF Elite: High BP, including DMSO *HCl and flammable solvent compatible models available
HT Series 3i (HT 6, HT 12)	Up to 6 sample carriers for HT6 model Up to 12 sample carriers for HT 12 model	microplates, vials, tubes, bottles, flasks	HT6: Up to 24 microplates, 288 tubes, 480 vials HT 12: Up to 48 microplates, 576 tubes, 960 vials	Entire range of solvents above
Rocket (Synergy 2)	6 flask holders, 6X3 ASE carriers, single batch (bowl)	flasks, ASE vials, single batch	Up to 6 400mL flasks, 18 ASE vials, 5L batch	Low to medium BP solvents, inc. water, DSM, methanol, TFA, DMF, organic solvents

Genevac miVac 2 Modular Concentrator Range

Designed for flexibility, modularity, and efficient solvent removal, the Genevac miVac 2 is a centrifugal evaporator system optimized for laboratory sample concentration and drying. Engineered to handle a wide range of solvents and sample formats, the miVac 2 delivers fast, gentle evaporation while preserving sample integrity.

Its compact footprint, interchangeable rotors, quiet maintenance-free operation, and advanced vacuum control provide a reliable, user-friendly solution for research, clinical, and molecular biology laboratories.

Features & Benefits

- **Wide solvent compatibility including water, alcohols, and medium boiling point organic solvents.**
- **Modular system design allows scalable configuration with concentrators, pumps, SpeedTrap, and optional pressure controller.**
- **High-performance vacuum pump options enable efficient drying for standard, demanding, and freeze-drying applications.**
- **Solid aluminum JetRotors provide superior heat transfer and faster concentration compared to plastic or open rotors.**
- **Flexible sample formats support microcentrifuge tubes, conical tubes, glass vials, and shallow or deep-well microplates.**
- **Integrated SpeedTrap cold trap efficiently condenses solvent vapors to improve recovery and maintain vacuum stability.**
- **Multiple SpeedTrap operating modes optimize performance for freezing, non-freezing, and mixed solvent applications.**
- **Optional Pressure Controller enables precise vacuum regulation and gentle ramping to minimize bumping and maximize recovery.**

Genevac EZ-2 4.0 Benchtop Solvent Evaporator

Designed for flexibility and simplified scalability from lab to production, the Genevac EZ-2 4.0 is a lab automation compatible solvent evaporator with lyophilization capabilities. The small benchtop footprint, multiple sample carrier capacity and innovative patented technology provide an unmatched user experience.

Features & Benefits

- **Unmatched solvent compatibility including DMSO, HCl and flammable solvents**
- **LyoSpeed technology offers the ability to lyophilize your samples in hours versus days**
- **Automation friendly Bionic model enables integration, programming with lab automation workflows**
- **Precise temperature control to maintain sample integrity**
- **Dri-Pure patented anti-bumping technology eliminates cross-contamination while improving safety**
- **Flexible sample formats allow quick adaptation to changing research needs - simply switch out carriers for microtiter plates, vials, tubes, bottles, flasks**
- **Intuitive touchscreen with pre-set methods and customizable options makes operation fast and easy for users of all experience levels**
- **Plug-and-play design enables simple install out of the box, enabling operators to run samples less than an hour after unboxing**
- **Patented EXALT technology for crystallization and polymorph studies – speeds up solid form selection, improving stability and reducing development time**
- **Automated condenser defrost and drain**

Genevac HT Series 3i Benchtop Evaporator

Designed for high throughput research and production workflows, the Genevac HT Series 3i provides increased throughput over the EZ-2 with some additional features.

Features & Benefits

- **Equipped with the same innovative technologies, methods and interface as the EZ-2, simplifying workflow standardization and scalability**
- **3-6 times the EZ-2 capacity in a slightly larger footprint. Ideal for labs scaling up without expanding their footprint**
- **User-editable method parameters to fine-tune protocols for optimal results across varied sample types**
- **Built-in thermocouples offer the ability to measure actual product temperature, improving efficiency and reducing sample loss, degradation**

Genevac Rocket Synergy 2 Benchtop Solvent Evaporator

Designed for high volume samples including batches in pharma, environmental, agricultural chemistry, and foods/flavors/fragrances workflows, the Genevac Synergy 2 enables high-speed, walkaway automation with up to 6 times the throughput of a rotary evaporator.

Features & Benefits

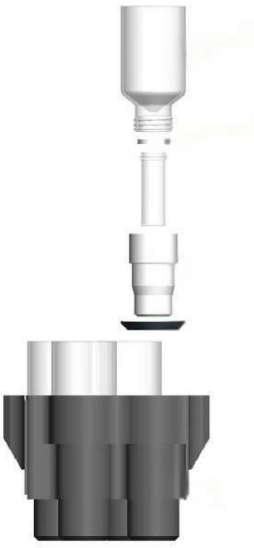

- **Replace several rotary evaporators with one benchtop instrument, saving valuable space and time**
- **Multiple sample formats supported, including flasks, ASE vials, and large volume batches up to 5L**
- **Innovative heating technology utilizes steam to maximize drying efficiency while chamber design eliminates potential for moisture in your samples**
- **Simple, intuitive user interface**
- **Equipped with the same capabilities and interface as the EZ-2, simplifying workflow scalability standardization**

Genevac Accessories

are designed to flex with your laboratory's changing workflow requirements and eliminate unnecessary steps. We offer a variety of accessories, including carriers for nearly every sample format and the SampleGenie™. Our goal is to enable more time for science!

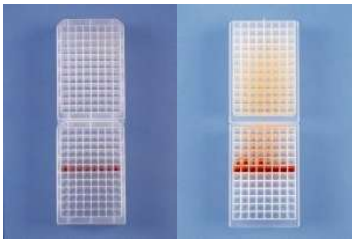

SampleGenie

Our groundbreaking SampleGenie technology reduces sample transfer steps by drying large volumes directly into a variety of small vials, minimizing handling errors, saving time, and preserving sample integrity. For HPLC purification workflows, multiple fractions can be seamlessly combined into a single tube and rapidly dried or lyophilized directly into the final vial—streamlining the process and boosting productivity.

Genevac Innovation: Patented Technologies Enabling Unmatched Workflow Efficiencies and Capabilities for Our Customers

Dri-Pure®: Anti-Bumping for Improved Sample Integrity

Dri-Pure is Genevac's proprietary anti-bumping technology, designed to prevent foaming, cross-contamination and sample loss during operation utilizing a combination of vacuum ramping, high rotor speeds, and optimized temperature control.

With Dri-Pure Without Dri-Pure

LyoSpeed™: Fast, Effective Lyophilization

LyoSpeed is Genevac's advanced lyophilization technology, designed to automate both concentration and lyophilization (freeze drying) in one step. HPLC fractions and other samples are concentrated, frozen, and lyophilized to produce a uniform dry powder. This two-in-one system streamlines your workflow, ensuring fast, reliable results.

- Ability to Lyophilize multiple HPLC fractions with different volumes at the same time
- Accelerates timelines by lyophilizing samples in hours instead of days; ideal for fast-paced drug discovery and QA workflows
- Available in the EZ-2 Elite and all HT models

EXALT™: Crystallization Capabilities

EXALT is Genevac's proprietary crystallization technology that allows users to grow and screen crystalline forms directly in the evaporation system under controlled conditions. With EXALT, labs can evaporate, concentrate, and crystallize in a single workflow — reducing manual handling, saving time, and increasing reproducibility.

Designed for:

- Polymorph studies in drug development
- Crystallization from mixed solvents
- Solvent-switching workflows

Accessories

Holders For Any Type Of Sample

Our wide range of sample holders means that all common sample formats can be accommodated with ease.

- Side-bridge swings accommodate a range of sample blocks for tubes and vials
- Fast-stack microplate holders accommodate two deep-well or four shallow-well plates per rotor position
- One-piece holders, which fit directly onto the rotor, are available for larger tubes, bottles, and flasks

All our sample holders are manufactured from high-grade solid aluminium to very tight tolerances that ensure a close fit for optimum heat transfer, and they are mass balanced so your evaporator always runs smoothly.

Cut Out Unnecessary Steps With SampleGenie

Our unique SampleGenie flask and sample holder technology enables large volume samples to be dried or concentrated directly into the small vial of your choice. HPLC fractions can be combined into one flask and dried, or fast lyophilized into the final vial, saving many transfer steps during the process.

Infinity Trolley

Our Infinity Trolley is a modular system, designed to accommodate our whole range of evaporation equipment including the new SP Genevac EZ-2 4.0 series. Simply join as many trolleys as you need side-by-side to optimize space within the lab. The trolley's upper shelf holds the evaporator, whilst the unique lower shelf 'truck' accommodates the pump and solvent waste container.
