GEA Niro Soavi Homogenizers
Technical Leaflet: Delivery PROGRAM

GEA Niro Soavi is the leading supplier of dynamic high pressure homogenization technology for a complete range of industries and applications. From food to cosmetic products, from drugs to chemical and biotech applications, homogenization technology plays a primary role and is applied to a variety of everyday, widely used products. This is the result of specific know-how and a spirit of innovation constantly focused on process performance. Thanks to a development strategy of both established and potential applications often based on cooperation with our customers' Research and Development Centers, GEA Niro Soavi can offer highly specific and customized process solutions to always meet, ensure and repeat over time product quality excellence.

Mumbai Branch Address:

Inkarp Instruments Pvt Ltd

310/311, B-Wing, Dhamji Shamji Corporate Square, Next to Kanara Business Centre, Laxmi Nagar, Ghatkopar East, Mumbai – 400075. Maharashtra.

Laboratory & pilot plant homogenizers.

Laboratory machines enable us to verify the homogenization effects and optimize the use of pressure.

From the initial concept, through pilot trials and final analysis: this is the right way to fine tune the perfect product's formulation and the best homogenizing condition. It helps to refine the most appropriate recipes, with minimum development time and maximum outcome security. Test results from laboratory homogenizers trials are reliable when scaling up to larger GEA Niro Soavi homogenizer.

Laboratory Homogenizers perfect for any application.

Our laboratory homogenizers are ideal for the treatment of nanoparticles, nanodispersions, nanoemulsions, cell disruption, and can also be used successfully for processing milk and dairy products, fruit juices and food in general.

Laboratory Homogenizers		
Models	**Max Pressure**	**Flow Rate**
PandaPLUS 1000	1000 bar	20 l/h
PandaPLUS 2000	2000 bar	9 l/h
TwinPANDA 400	400 bar	55 l/h
TwinPANDA 600	600 bar	30 l/h

Pilot Plant Homogenizers the high pressure units ideal for continuous operation.

These pilot high pressure homogenizer units are designed for continuous operation up to 1500 bar and limited productions easy Plug & Play installation, simple operation and quick maintenance. Pony NS2006L and Panther NS3006L models are standalone fully equipped laboratory units for food & beverage, pharmaceutical, biotechnology, cosmetic, chemical testing or small scale production, featuring the performances of the industrial scale homogenizers.

Pilot Plant Homogenizers		
Models	**Max Pressure**	**Flow Rate**
Pony 1200	1200 bar	80 l/h
Pony 1500	1500 bar	35 l/h
Panther 1200	1200 bar	120 l/h
Panther 1500	1500 bar	50 l/h

Ariete series.

State-of-the-art technology for total customer satisfaction.

The Ariete machines are the state-of-the-art technology for powerful reliable high pressure homogenizers and customized solutions. Compliant to EU safety rules (CE standards) and built according to EN ISO 9001:2008 Quality System, are the best fit for dairy, food & beverage, chemical and cosmetics, pharmaceutical and biotechnology industries.

Ariete Series Models Max Flow Rate (l/h)

Models	100 BAR	180 BAR	200 BAR	250 BAR	400 BAR	600 BAR	1000 BAR	1200 BAR	1500 BAR

Each capacity value shown above refers to a machine designed for the specific maximum pressure and the specific maximum capacity.

Main options on request.

- 2nd stage homogenizing valve
- High efficient NanoVALVE™ 2G or NanoVALVE™ technology
- Special materials used for high pressure block, plungers and homogenizing valves
- Electric power board for fixed or variable capacity
- Machine automation and remote controls
- Aseptic execution
- 3-A execution, FDA approved gasket and cGMP documentation and support
- High pressure pump version
- Very high pressure liquid-end configuration

The energy-efficient PandaPLUS high pressure homogenization technology provides maximum yield and effective particle size reduction.

It is the state-of-the-art solution for:

- nanoparticles
- nanoemulsions
- nanodispersions
- cells distruption and it can be used successfully for processing
- nutraceuticals
- specialty formulated products
- flavors and additives.

Technical Specification:

PandaPLUS 1000

- Rated flow 20 l/h
- Max. operating pressure 1000 bar
- Min. sample volume 60 ml
- Dimensions 81x54x44 cm
- Weight 98 kg
- Sound Pressure Level < 69 dB(A)
- Feeding Hopper Volume 0,4 l

PandaPLUS 2000

- Rated flow 9 l/h
- Max. operating pressure 2000 bar
- Min. sample volume 30 ml
- Dimensions 81x54x44 cm
- Weight 98 kg
- Sound Pressure Level < 69 dB(A)
- Feeding Hopper Volume 0,4 l

Technical specifications are not mandatory and subject to change without notice.

Available Option:

- Aseptic execution
- Full pharmaceutical version (cGMP certification manual)
- FDA approved gaskets
- Jacketed feed tank
- Pneumatic pusher for feed tank
